

Service Engineering Inc.

OFFERS **FIELD SERVICE PREVENTATIVE MAINTENANCE**

& REPAIR ON

ALL BRANDS OF FEEDING EQUIPMENT

YOU NAME IT, WE CAN FIX IT

- *Vibratory Feeder Bowls*
- *Centrifugal Feeders*
- *Inline Tracking*
- *Hoppers*
- *Elevators*
- *Base Drives*

**CALL US FOR A QUOTE
TODAY! In most cases, we can
be available within 24 hrs.**

Do Your Feed Systems:

- Start up slowly and continue to speed up throughout the day, requiring constant operator assistance? ***We can re-tune them!***
- Jam constantly in the same place, regardless of the “quick fixes” recommended to you by the original equipment manufacturer? ***We can fix it!***
- Require too much time to change tooling from feeding one style part to another? ***We will make it more “user-friendly”!***
- Need re-lining? ***We offer Urethane, Surlyn, Teflon, Brushlon or Armaskirt linings for all vibratory feeders!***

SERVICE ENGINEERING IS YOUR FULL SERVICE PARTS FEEDING SPECIALIST.
Call us today! We may be able to ‘talk you through’ your feeding problems over the phone.....for free!

SERVICE ENGINEERING will provide these field repair and maintenance accommodations:

- Portable welding capabilities. If repair work is required and you do not have welding equipment available, we can provide welding services on site (for customers within driving distance of our facility).
- Re-tooling due to normal wear or part change (extensive repair may need to be returned to our facility).
- Re-tune your existing feeder to its maximum potential, using our state-of-the-art **Accu-Tune** Controller.
